Title: ACI 302.1R-04: Guide for Concrete Floor & Slab Construction

WRMCA Member Price: \$69 hardcopy

Abstract: This guide describes how to produce high-quality concrete slabs-on-ground and suspended floors for various classes of service. It emphasizes aspects of construction such as site preparation, concreting materials, concrete mixture proportions, concreting workmanship, joint construction, load transfer across joints, form stripping procedures, finishing methods, and curing. Flatness/levelness requirements and measurements are outlined. A thorough preconstruction meeting is critical to facilitate communication among key participants and to clearly establish expectations and procedures that will be employed during construction to achieve the floor qualities required by the project specifications. Adequate supervision and inspection are required for job operations, particularly those of finishing.

I would like to order ____ package(s) of *Guide for Concrete Floor and Slab Construction*. To pay with **American Express, VISA or MasterCard...**

Card holder name: _____

Signature: _____
